Digital Page Pack Spool and Cage Rebuild

After many request to rebuild these early digital assemblies (spool and cage), we are now set up to do so. We have found that the holes in the cage do not line up with the holes in the spools. We make new cages of tool steel heat treated to 60 Rockwell C, and then

grind the spools on centers to remove the groves worn in them by ink and the seals. After grinding we put hard chrome on the spools, and grind the spool to fit the cage with a close tolerance fit. Our price does include all materials except the 2 new seals inside the cage. Either the customer can supply the seals, or we can supply them for an additional fee. If you have any questions about these or any other pressroom related items, please let us know.

Quantity	Part Number	Description	Price Per Part
1-72	PPP-E27063-1R	Digital Page Pack Spool and Cage Assembly Rebuild • Oil Seals Not Included	\$165.00 Each
1+	PPP-B161793-1	Digital Inker Seal	\$9.25 Each
