## **One Piece Knives and Cheekwoods**

If you're one of the many pressrooms getting ready to test one piece knives and or cheekwoods, or have already changed, we have them. We believe a one piece knife will definitely make a cleaner cut and prolong cutter rubber life. Most pressrooms replace the segmented blades on a knife box rebuild anyway, so there is no additional cost to switch to a one piece blade. We either already stock or can make any one piece cheekwood. Give us a call when you are ready for a knife box rebuild. We have all the parts necessary to do it properly.
