### **Water-Boi**

Water-Boi is a tightly knit, dense pile, loop finished cover that is specially treated to control proper water absorption and prevent flooding. While highly absorbent, it is an economically priced cover that is tough and durable. Used on web offset and sheet fed presses.

### **Blue-Boi**

Blue-Boi is a synthetic shrink to fit, lint free, ink resistant cover offering superior performance and durability. Made from specially formulated fibres to insure maximum performance and durability. Fibres produce a consistently uniform transfer of water to the plate. Customers report "no other cover lasts longer." Shrink to fit multi-directional shrink locks cover onto roller surface. Eliminates cover movement, such as twisting, creeping or walking. Lint free provides superior reproduction, eliminates unwanted cover generated "hickeys." Ink Resistant cover stays clean, insures smooth even water transfer; cover cleans up with water, ink washes off easily; extends life of the cover. Blue-Boi's smooth and uniform surface delivers a consistently uniform water transfer without patterning or tracking.

### **Blue-Lightning**

Blue-Lightning is a synthetic shrink to fit, lint free cover that lasts longer than cotton with easy clean-up. Same as Blue-Boi except it is a thinner cover that allows more room for roller adjustment and carries less water.

### **Go-Knit**

Go-Knit is an extremely tough and durable, dense knit cover developed to withstand the high speeds of web offset newspaper presses. It is a highly absorbent non-looped product that lasts and lasts. Extremely popular with all newspaper presses. Known for its durability.

### **Litho-Build**

Litho-Build is a tightly knit cover, similar to Go-Knit, but lighter in weight, and less water absorbent. Popular with newspaper presses. Also used for building up the diameter of dampening rollers. Adds 1/16" to diameter.

### **G-Knit**

Manufactured to be used over other covers, for fast color changes. Keeps under covers clean.

### **Water Control Levels**

**Lesser Water Pick-Up — Greater Water Pick-Up**
