Roller Treatments

A-B. Wet Roll®

Hydrophilic coating for rubber metering and bareback rollers that overcomes their natural tendency to pick up ink. Greatly reduces need for alcohol and substitutes because treated surface holds and transfers water more effectively.

C-D. Chrome Cleaner Desensitizer

Unique blend of cleaning and desensitizing agents, including pure gum arabic, offer an easy one step treatment for the chrome roller. Improves water transfer simplifying ink/water balance.

E-F. Clearz-It®

Quick acting cleaner, conditioner and desensitizer for all types of web and sheet-fed metal plates. Easily removes scum, light scratches, dried ink and much more from the plates on the press.

G-H, J. Dri-Rol-Lube®/UV-Rol-Lube™

Multi-purpose lubricant protects and conditions idle rollers on non-printing unit. Excellent for back cylinders, eliminates ink and gum pick-up preventing any build up of rust. For

UV printers, we offer **UV-Rol-Lube** that has been specifically formulated for EPDM type of rollers.

K-L. Deglaz-It®

Unique scrubbing agent easily removes glaze from rollers and blankets. Simple to use paste rinses off easily with roller blanket wash. A must for quick color changes and proper roller maintenance.

I. Meter-Rol-Clean®

A must for an environmentally friendly pressroom, offering a moderate drying speed, high flash point and no oily residue. It is free of any ozone depleting substances which are found in many low flash point MRC products.
