## **Plain and Pin Side Cheekwoods**

More than ever, Newspaper production departments need to find ways to save money. Precision Press Products, LLC is always trying to find better ways to produce parts for Newspaper production departments that will both save them money but also supply better

replacement parts. We have found a premium supplier for the material used in the manufacture of Phenolic products for the printing industry. One of these products is the Phenolic cheekwoods (cushions) for the folder knife box. By buying this premium Phenolic in large quantities, we are able to supply the Newspaper industry with a high quality knife box cheekwood and at an exceptional price. We currently make most, if not all the different Phenolic cheekwoods for the different Newspaper printing presses. If your printing press has had numerous web width reductions and something out of the ordinary has been done when your folder was cut down, then just send us a sample of your cheekwoods and we will duplicate them. We don't charge extra for this service. In fact, we have now made the price for all pin side cheekwoods, regardless of the number of pin slots, the same price. Check out the pricing that we have on our plain and pin side cheekwoods and I believe you will find that our price is more than competitive. We are confident that if you try our cheekwoods, you will be more than happy with the price, quality, and our service.
